**15th Sunday in Ordinary Time**  
**CALOUNDRA CATHOLIC PARISH NEWSLETTER**  
**Editorial**

The means of communication between human beings are the spoken and written and printed word. This is enhanced by other things, paintings, photos, cartoons and the advances in communications that modern technology has brought about; radio, telephones, TV, computers, and much more. A cartoon, picture or graphic and the like can tell a story that would take a lot of words to convey.

The changing nature of our English language is readily apparent. The slang words “bloke” or “Sheila” and “Going down the frog and toad to have a pig’s ear at the rubbidy-dub,” have disappeared. A four wheel drive has become an S.U.V., and the recent, “He or she gave him or her a serve” has been changed by other terminology. Languages are not static but coin new words and phrases that are necessary for communications. The dramatic advance of science has changed the way we speak and write enormously. When it comes to communicating with God and conversing in prayer, “God knows what you need before you ask.” Mt. 6:8. God understands any or all means of communication, the language we use is not in any way critical in our conversation with God. Language is only necessary in our communication with other human beings.

**Therefore, there is not sublime language to use in communicating with God, and an inferior language for communicating with other human beings.**

The language used in worship is therefore only for the benefit of other human beings, but of course we as human beings in our relationship with God desire to have a clear understanding of what we are saying, singing, reading, writing or printing so those who are participating in a liturgy with us are inspired and fulfilled. Therefore the use of archaic grandiose outdated terms or bad translations from a dead language would be counter-productive.

If we want to attract the younger generation to share in our liturgies, it would seem that we would have to use a language that is the day to day language that is used in education and ordinary conversation. How would it be if our teachers in our schools would have to rely on translations from a dead language that does not take into account how our modern English language has developed, what a shambles that would be.

**THE LANGUAGE OF WORSHIP SHOULD BE THE  
LANGUAGE OF TODAY WITH TODAY’S TERMINOLOGY.**
